

ADARSH MANJUNATH NAIK

☎ +91-7477007852 ✉ adarshnaik270@gmail.com in [Linkedin](#) 🐙 [Github](#) 🔗 [Leetcode](#) 📁 [Portfolio](#)

Education

International Institute of Information Technology, Naya Raipur <i>B.Tech Electronics and Communication Engineering - CGPA: 8.12</i>	2022 – 2026 <i>Chhattisgarh</i>
Gyan Ganga Educational Academy <i>10th CBSE - 93%, 12th CBSE - 92%</i>	2019 – 2022 <i>Chhattisgarh</i>

Experience

Arcesium <i>Software Engineer</i>	07/2026 – Present <i>Hyderabad, Telangana</i>
- Working on enterprise-scale post-trade fintech platforms, contributing to automation, quality engineering, and platform reliability. - Building scalable test automation and infrastructure while collaborating with cross-functional engineering teams.	
Arcesium <i>Software Engineering Intern</i>	04/2026 – 06/2026 <i>Hyderabad, Telangana</i>
- Worked on Scaling Automation on Kubernetes with Real-Time Observability, designing API and UI automation using Playwright and TypeScript. - Leveraged AI-assisted testing techniques to improve test generation, regression coverage, and workflow efficiency.	
GUNI SSRP – Centre for Advanced Research Studies 🔗	05/2025 – 07/2025 <i>Remote</i>
<i>Research Intern</i> Developed a hybrid AR campus navigation system integrating GPS and QR-based indoor navigation.	

Projects

CricStore 🔗 <i>MERN, Next.js, PostgreSQL, Kafka, AWS</i>	01/2025 – Present
- Architected a scalable microservices-based eCommerce platform for cricket gear; designed 5 isolated services with RSA-based authentication and multi-tenancy support. - Integrated Kafka and WebSockets to deliver real-time updates, significantly reducing client-side wait time and enabling a live shopping experience. - Optimized data flexibility using EAV modeling in PostgreSQL and deployed services on Render with Docker, ensuring high availability via GitHub Actions CI/CD. - Integrated SonarCloud to track code quality metrics including coverage, duplication, and maintainability ratings across all microservices, driving measurable improvements in overall code health.	
FileVault 🔗 <i>C++, OpenSSL, Inter-Process Communication</i>	12/2024 – 04/2025
- Developed a high-performance file encryption utility using OpenSSL (AES-256-CBC) that recursively processes directory structures with a modular, secure architecture. - Engineered a parallel processing system using <code>fork()</code> and shared memory to handle concurrent tasks, ensuring thread-safe execution via semaphore synchronization.	
AI-Powered Interview Platform 🔗 <i>React, Node.js, MongoDB, Gemini AI</i>	02/2025 – 03/2025
- Built a full-stack application simulating job interviews using Gemini AI, providing real-time feedback, scoring, and personalized improvement insights. - Implemented secure JWT authentication and optimized MongoDB schemas to manage users and interview history, wrapped in a responsive UI with React Query.	

Technical Skills

Languages: C++, C, Python, JavaScript/TypeScript, SQL
Frontend: React, Next.js, Tailwind, Redux, Zustand, Vite
Backend: Node.js, Express, Flask, REST APIs, Microservices, Socket.IO, Kafka
Databases: PostgreSQL, MongoDB, Redis, Mongoose, TypeORM
DevOps: Docker, GitHub Actions, GitLab CI, Jenkins, ArgoCD, CI/CD, SonarCloud, Cypress, Playwright
Tools: Git, VS Code, Postman, Linux, Figma, JIRA
Cloud: AWS (EC2, S3), Confluent Cloud (Kafka)
